

AR Collection 6.x HotFix #3

Issue: When creating documents from the Document Generation Screen XC.144.01 (pictured below) the New Note field was not being cleared when the customer was changed by the user. This resulted in notes being created for the wrong customer.

Solution: Logic added to clear the New Note field if the customer field is changed.

The screenshot displays the AR Collections Manager (XC.144.00) interface. The window title is "AR Collections Manager (XC.144.00)". The interface is divided into several sections:

- Customer Information:** Fields for Customer (C300), Name/Days (School of Fine Art), Total (0.00), 31 To 60 (0.00), Contact, Attn, Current (0.00), 61 To 90 (0.00), Cust Mnt, Contacts, Phone ((555) 555-0120), 1 To 30 (0.00), and Over 90 (0.00).
- Note/Action Information:** A table with columns: Date, User, RefNbr, Contact, and Note. The first row shows Date: 4/30/2008, User: SYSADMIN.
- Current Note (View Only):** A text area for viewing the current note.
- New Note:** A text area for entering a new note.
- Buttons:** Show WorkList, Refresh Views, Add Note/Act, Print Invoices, Email Customer, Open Letter, Edit Note, and Delete Note.
- Status Bar:** 0060, SYSADMIN, 4/30/2008
