The Data Locator Utility allows you to enter any value and quickly see all of the locations where data resides.

This is a favorite among consultants, IT professionals, customers, and our own Support Team. The Data Locator is an application-agnostic SQL Server database search tool that allows search terms across all tables and columns in a specified database.

KEY BENEFITS

- Uses virtually no resources
- Simple, wizard-based installation
- Can search any SQL table, not just for Dynamics
- Capable of providing "fuzzy matches" & exact matches

- Doesn't need to be installed on the server
- Won't slow down other processing
- You don't need to be a DBA to run it
- Easy button to copy information into SQL select or update statements
